#### **DETAILED ACTION**

## Response to Arguments

1. Applicant's arguments with respect to claims 1-18 have been considered but are most in view of the new ground(s) of rejection.

## **Double Patenting**

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,678,510. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of the claims of the instant application are broad enough to be encompassed by the claims of the patent and as such it would have been obvious to one of ordinary skill in the art to use the teaching of the implement the claims of the instant application for the benefit of ensuring an accurate and stable frequency reference for time synchronization.

Art Unit: 2686

### **Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patrick et al. (6,522,871) discloses a method for compensating for local oscillator frequency error.

Rodal et al. (6,356,602) discloses an integrated circuit for a GPS receiver.

Bloebaum (6,535,815) discloses a mobile terminal equipped with a GPS receiver.

Kawano et al. (5,440,491) discloses a pseudo GPS signal transmitting system in a base station.

Krasner (5,663,734) discloses a GPS receiver for processing GPS signals.

Horton et al. (6,041,222) discloses a system for sharing RF signals within a wireless mobile terminal having a GPS receiver.

Tsujimoto et al. (6,462,708) discloses a GPS-based positioning for mobile GPS terminals.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Appiah whose telephone number is 703 305-4772. The examiner can normally be reached on M-F 7:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on 703 305-4379. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
